Education

Oregon State University – Honors Bachelor of Science in Computer Science, GPA 3.86 2017 – 2021

- Research: Data Analysis and Visualization with Unreal Engine - URSA Engage 2019 with Dr. Raffaele de Amicis
- Thesis: Improve the Grasping Performance by Analyzing Target Objects with Computer Vision and Deep Learning Algorithm - Honors College Thesis with Dr. Cindy Grimm and Oregon State University Robotics team

Technical Skills

Programming Languages: HTML, CSS, JavaScript, TypeScript, Go, Python, PHP

Frameworks & Tools: React.js, Vue.js, Video.js, Next.js, Tailwind CSS, RESTful APIs

Cloud & DevOps: AWS (S3, RDS, Lambda, SQS, CloudFront), Docker, Git, Cron, CloudWatch

Databases: MySQL, MongoDB, RedShift

AI/ML: AWS SageMaker, OpenAI APIs, TensorFlow, PyTorch

Experience

Software Engineer, Ezoic Inc. – Carlsbad, CA March. 2022 – June. 2024

- Built and scaled APIs in **Go** for video uploads, analytics, and monetization, supporting **10K+ Publishers**.
- Designed and launched **Humix**, a video platform (Vue.js, Go, MySQL, AWS) that cut buffering by **30%** and increased ad impressions.
- Integrated Humix with **publishers' WordPress sites**, enabling seamless video embedding and monetization for content creators.
- Developed **microservices with Go, Lambda, SQS**, reducing upload latency by **40%** and enabling batch scalability.
- Extended **Ezoic's Chrome extension** with Humix-related features, making video management more accessible for publishers.
- Leveraged **SageMaker + ChatGPT APIs** to match videos with webpage topics, boosting retention by **20%**.
- Supported **DevOps operations** (CloudWatch, Opsgenie), ensuring **99.99% uptime**.

Frontend Developer, Wizrds LLC. – Sacramento, CA June. 2021 – January. 2022

- Delivered **customer-driven projects**, gathering requirements and turning them into production-ready web apps.
- Built **React.js components** from Figma mockups, streamlining design-to-code workflow.
- Integrated **Node.js + MongoDB APIs**, improving response time by **25%**.
- Optimized projects for **cross-browser and mobile responsiveness**, ensuring client satisfaction.
- Collaborated directly with customers and UX/UI designers to implement requested features and **ship tailored solutions**.

Projects

Humix.com | JavaScript, Vue.js, Go, AWS, MySQL, Video.js 2022 – June.2024

- Built from scratch a video content platform enabling creators to upload, embed, and monetize videos.
- Engineered RESTful APIs in Go and managed video lifecycle (upload, processing, analytics).
- Used SageMaker for smart video matching and OpenAI APIs for automatic categorization.
- Managed cloud infra on AWS ensuring high availability and fast delivery with optimized DB queries.

Check-crypto | JavaScript, React, Go, AWS 2024 – Present

- Developed a web-based platform providing trust levels of cryptocurrencies for all users, acting as a scam checker.
- Implemented backend services using Go and AWS to analyze and verify cryptocurrency data.
- Designed and developed the front end with React.js to ensure a user-friendly interface.
- Integrated RESTful APIs to fetch real-time data on cryptocurrency legitimacy and potential scams.
