Education

Oregon State University – Honors Bachelor of Science in Computer Science, GPA 3.86 2017 – 2021

- Research: Data Analysis and Visualization with Unreal Engine (URSA Engage 2019, with Dr. Raffaele de Amicis)
- Honors Thesis: Improved robotic arm grasping performance using ROS2, Gazebo simulation, and computer vision with deep learning (with Dr. Cindy Grimm, OSU Robotics team)
- Hackathon: 3rd Place, OSU BeaverHacks Spring 2021 — built an automated cryptocurrency trading bot using Python, Flask, and OpenAPI

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Vue.js, Next.js, Video.js, Tailwind CSS, WordPress

Backend: Go, Python, Node.js, PHP, RESTful APIs

Cloud & DevOps: AWS (S3, RDS, Lambda, SQS, CloudFront, CloudWatch), Docker, Git, Cron

Databases: MySQL, PostgreSQL, MongoDB, Redshift

AI/ML: AWS SageMaker, OpenAI APIs, TensorFlow, PyTorch

Experience

Freelance Software Engineer – Remote Feb 2025 – Current

- Delivered client projects across web and backend, including custom WordPress/PHP websites tailored to small business needs.
- Boosted local SEO performance, improving client Google search rankings from 100+ to Top 30, driving measurable increases in traffic and inquiries.
- Built lightweight RESTful APIs and integrated databases (PostgreSQL/MySQL), enabling clients to manage and scale operations more efficiently.
- Designed and deployed responsive, mobile-first websites, improving page load times by 25% and reducing reported UI/UX issues by 30%.
- Implemented modern frontend features (React components, Tailwind css styling, Elementor customization), enhancing customer engagement and conversion.

Software Engineer, Ezoic Inc. – Carlsbad, CA Mar 2022 – Jun 2024

- Built and scaled APIs in Go for video uploads, analytics, and monetization, supporting 10K+ content creators and publishers.
- Designed and launched Humix, a video platform (Vue.js, Go, MySQL, AWS) that cut buffering by 30% and increased ad impressions.
- Integrated Humix with publishers' WordPress sites, enabling seamless video embedding and monetization for content creators.
- Developed microservices with Go, Lambda, SQS, reducing upload latency by 40% and enabling batch scalability.
- Extended Ezoic's Chrome extension with Humix-related features, enabling publishers to embed and manage videos directly from their browser.
- Leveraged SageMaker + ChatGPT APIs to match videos with webpage topics, boosting retention by 20%.
- Supported DevOps operations (CloudWatch, Opsgenie), ensuring 99.99% uptime.

Frontend Developer, Wizrds LLC. – Sacramento, CA Jun 2021 – Jan 2022

- Delivered customer-driven projects, gathering requirements and turning them into production-ready web apps.
- Built React.js components from Figma mockups, streamlining design-to-code workflow.
- Integrated Node.js + MongoDB APIs, improving response time by 25%.
- Optimized projects for cross-browser and mobile responsiveness, reducing UI-related bug reports.
- Collaborated directly with customers and UX/UI designers to implement requested features and ship tailored solutions.
